INDEX TO THE WATERMARK
Newsletter of the Archivists and Librarians in the History of the Health Sciences
Volumes I-XVIII
1976-1995

Introduction

This index covers the first nineteen years of The Watermark, from Volume I, Number 1 (October 1976) to Volume XVIII, Number 4 (Fall 1995). Virtually every article, news item, query, book review or note, including individual items from “Conservation News” and “Ex Libris,” has been included under subject, personal, or institutional name headings. Articles have not been indexed by title. The subject vocabulary is drawn largely from MeSH (Medical Subject Headings) and Library Literature.

Under each main heading entries are listed alphabetically, except in a few cases (e.g. ALHHS. Annual meeting) where chronological order was most logical. Under personal name headings, the titles of Watermark articles written by the person are listed alphabetically before subject subheadings.

Several broad headings have been used to bring together frequently-recurring categories of information. These include: Acquisitions; Awards, grants, fellowships; Conferences, meetings, panels, workshops; and Exhibits. In addition, Awards, etc., are cited under the personal or institutional name of the recipient and the grantor and Exhibits and Acquisitions under individual institutional headings. Conferences are cited under the institutional name only if the conference is chiefly a manifestation of the institution. Books reviewed or noted are indexed under their main heading and under the author of the review.

To avoid long strings of institutional hierarchy, most institutional references are to the name of the highest body (e.g. University of Minnesota), not the name of the medical or medical history library (i.e. Wangensteen Library). The latter may generally be assumed.

Standard abbreviations are used. State names are shown by the postal service two-letter abbreviations. Organization names are generally spelled out in the heading and abbreviated in the entries; the abbreviation is alphabetized as it appears, not as if it were fully spelled out, thus avoiding the necessity of splitting the ALHHS entries between “Association” and “Archivists.” However, owing no more reverence to that hobgoblin of little minds than is conformable to sound indexing practice, I have accorded to librarians who have undergone name-changes in the course of these nineteen years entries under both names.

Carol Clausen
National Library of Medicine

“A foolish consistency is the hobgoblin of little minds.” R.W. Emerson. Self Reliance.
