President's column

by Nancy W. Zinn

An inaugural address, like a New Year's resolution, is a personal commitment. I would like to offer a few thoughts on the possible goals and functions of this young organization, in the hopes of eliciting similar ideas from all of you.

Early on we had discussed the concern we all feel for the conservation and preservation of the materials--books, manuscripts, documents, artifacts, etc.--we deal with every day. This concern goes beyond the protection of existing materials to those yet to come. Should we not attempt to make a concerted effort with other groups to enjoin publishers to use acid-free paper? Likewise, the reproduction industry should be encouraged to develop a planetary copier to protect rare materials while allowing them to be copied for scholarly and related purposes. Should we not discuss and perhaps agree on some guidelines for the education of future librarians in the history of the health sciences, possibly stimulating the development of continuing-education courses more specific to rare book librarianship in the health sciences?

Most importantly, we should aim at the greater knowledge (among ourselves at least) of collections and policies governing their use in each of our institutions so that students and scholars might be encouraged to further discovery. An exchange of information on such courses as are currently taught on the bibliography of the history of the health sciences would be most valuable. We should also encourage the publication by our members and others of such guides and bibliographies of the literature on a local and regional basis. Some of this information has already been gathered for the mostly-unpublished Directory of Collections in the History of the Health Sciences. Much manuscript and archival material still lies undiscovered by the medical-history public in city and state libraries, and historical society collections. Should we publish what we have or can obtain in The Watermark, as a regular feature? We have included a few entries recently approved by the

libraries described in this issue and plan to do so in the next as well. We should appreciate your reactions to this series in particular.

None of these ideas is new to most of you. I am sure other thoughts as well have occurred to you. If the Association is to be a viable, productive one, we need the contributions of every member. Please contribute your suggestions, criticisms, etc., especially with regard to the publication of the Directory, to me or to Lisabeth Holloway.

Note. A number of copies of Philadelphia Resources in the History of the Health Sciences, a preliminary edition of part of the Directory of Libraries in the History of the Health Sciences, (Philadelphia, 1975; 44 p.) are available, and can be obtained by writing to the Editor.

Election results !!!

We are happy to announce the election of the first regular officers of the Association. Thanks very much for responding promptly with the ballots. The regular term of office will run from December 1, 1977 to December 1, 1979.

Chronological Coverage of Principal Medical Indexes by Estelle Brodman

Dr. Brodman's tabular bibliographies of reference works in medical history can be used as training devices for neophyte staff members, especially in reference and cataloging, and for the library user, new or experienced. We are grateful to her for letting us present them here.

A select list of catalogs of rare medical books and bibliographies on the history of medicine published in 1976 and 1977 by Philip J. Weimerskirch

Hargreaves, Geoffrey D.

A catalogue of medical incunabula in Edinburgh libraries. Edinburgh, Royal Medical Society, 1976.

Limited edition of 400 copies. There are one hundred entries and six indexes: additional contributors (authors, commentators, translators, editors, etc.), select subjects, places of printing, printers and publishers, former owners and associations, and present owners.

The Heberden Society, London.

Catalogue of the library. London, 1976.

"Part 1. Earlier Books--up to and including 1914," p.1-43.

The collection has many rare English works on gout, rheumatology, spas and spa waters.

Herzog August Bibliothek, Wolfenbützel.

Verzeichnis medizinischer und naturwissenschaftlicher Drucke, 1472-1830. Nendeln, Liechtenstein, KTO Press, 1976-

Reihe A: Alphabetischer Index, 4 vols.

Reihe B: Chronologischer Index, 3 vols.

Reihe C: Ortsindex, 3 vols.

Reihe D: Systematischer Index, 3 vols.

Reihe B is the only part published so far, but the others are promised soon. The total price for this catalog is 2520 S.Fr. or about \$1260.00, but one can get Reihe A alone for the pre-publication price of S.Fr. 750 (\$375), Reihe B for S.Fr. 540 (\$270), Reihe C, if it has not yet been published, for S.Fr. 450 (\$225) or S.Fr. 540 if it has, and Reihe D, to be published in 1978, also for the pre-publication price of S.Fr. 450. Considering that this work is reproduced from typewritten copy, even the pre-publication prices seem rather steep.

Indiana University. Lilly Library.

Notable medical books from the Lilly Library, Indiana University. [Prepared by William R. LeFanu; edited by S. O. Waife ... et al.] Indianapolis, Ind., The Lilly Research Laboratories [1976]. \$6.00

In this lavishly produced volume "one hundred and thirty medical books from the collection of J.K. Lilly, Jr., are described...." It is the closest approach to a "Grolier 100" for medical books published so far, although the descriptions are more biographical and historical than bibliographical. In fact the book is a curious combination of catalog and picture history of medicine. There is one illustration for each book described, but a number of these were not taken from the book itself. They bear some relation to the content of the book, but the more romantic illustrations seem strangely out of place in a catalog of medical classics. Several of the illustrations are rather muddy in appearance

because of the use of brownish ink on cream-colored paper. The book is a great bargain, however, and the descriptions are very well written.

ISIS cumulative bibliography ... edited by Magda Whitrow. Vol. 3: Subjects. London, Mansell, 1976. \$56.00

Kanazawa Daigaku. Igaku Toshokan.

Koisho mokuroku [Catalog of old and rare books in the Kanazawa University Medical Library]. Kanazawa, Kanazawa Daigaku Igaku Toshokan, Showa 51 nen [1976].

Nation, Earl F., Roland, Charles G., and McGovern, John P.

An annotated checklist of Osleriana. [Kent, Ohio] The Kent State University Press, 1976. \$27.50

Contains 1367 entries and two appendices, "Osler Reprints" and "Osler Memorial Volumes." Reviewed by Ellen B. Wells in Bulletin of the Medical Library Association, 65(4):489-490, Oct., 1977.

Northwestern University. Dental School Library.

A catalogue of the rare book collection ... comp. by Wilma Troxel. [Chicago] 1976.

"The Collection now consists of 1,390 volumes, with 1,246 author or title entries. This Catalogue contains only those entries, plus desirable cross-references, but additional records have been made to analyze titles by date, language, place of publication and publisher. The writings of some 775 authors are included with forty-five per cent in English."

State University of New York at Buffalo. Health Sciences Library.

Catalog of pre-nineteenth century materials in the history of medicine collection at the Health Sciences Library. Comp. by Linda Morgan. [Buffalo, 1976] (HSL Publication No. 10-6)

This unpaginated catalog was made by reproducing catalog cards. Both author and title entries are given, and facsimiles of rare books are included.

University of Illinois at the Medical Center, Chicago. Library of the Health Sciences.

A catalog of prefire Chicago imprints (1844-1871). Comp. by Edward P. Rich, D.D.S. Chicago [1976] \$3.00

A bibliography of 102 items with a chronological index, an index to printers and publishers, and a subject index.

Wellcome Historical Medical Library, London.

A catalogue of printed books in the Wellcome Historical Medical Library. Vol. III, Books Printed from 1641 to 1850, F-L. Comp. by H. R. Denham. London, 1976. \$55.00

KANSAS CITY Plans are not yet settled for the ALHHS meeting in Kansas City prior to AAHM. Special notice will be mailed out shortly.

News & announcements...

MLA HISTORY OF MEDICINE GROUP at CHICAGO To be held at the Palmer House (presumably -- room assignment to be announced) on Monday, June 12, 1978, at 2:15 P.M. **Program:** A panel discussion on "Medical Archives: Acquisition, Preservation and Use," Robin Overmier, Moderator. **Speakers:** Walter L. Necker, Biomedical Librarian, University of Chicago, and MLA Archivist, on "Archives"; Richard D. Smith, Ph.D., of Wei-T'o Associates, on "Deacidification: Past, Present, and Future"; and William K. Beatty, Professor of Medical Bibliography, Northwestern University, on "What Will They Do with It?" A business meeting will follow.

OSLER LIBRARY'S NEW "FRANCIS WING" The Osler Library is acquiring additional shelving space for rare and circulating books.

The area is named "The Francis Wing" after Dr. William Willoughby Francis (1878-1959), librarian of the Osler Library from its inception in 1929 until Francis's death in 1959. A Seminar Room located in the Francis Wing contains a plaque in memory of Dr. Francis, with an inscription bearing testimony to his devotion to Sir William Osler:

"That man is great, and he alone,
Who serves a greatness not his own,
For neither praise nor pelf;
Content to know, and be unknown
Whole in himself." - Owen Meredith

Construction of the new wing should be completed by April, 1978. The project is being financed by a member of the "Friends of the Osler Library" with additional funds from McGill University.

THE HISTORY OF MEDICINE COLLECTION, DUKE UNIVERSITY "Medical Politicks, an exhibition illustrating the history of the education and government of doctors," is reported by Terry Cavanagh, in the form of a handsome catalogue. Ranging in date from 1651 to 1977, and in subject from "Chymical physick" through "Poetical Medical Politics" into "Homeopathy," "Osteopathy," "Chiropractic," and out again to conclude with "National Insurance Act, 1911" (Great Britain) and "Lay Psychoanalysis" (Freud). Both the book collection (loaned) and the catalogue are the work of Andrew Nadell, M.D., Duke 1974.

"BRITAIN'S MEDICAL HERITAGE" will be the subject of two summer conferences in 1978, sponsored by our new member, Nicholas Dewey (see below), to commemorate the quatercentenary of Harvey's birth. They are to be held, 1) at Imperial College of Science, London, August 28 to September 8, and, 2) at Worcester College, Oxford, September 8 to 22. Nicholas especially asks us to note that librarians are warmly invited.

CAN YOU LOCATE a copy of *Osservatore medico* (Palermo) 1834 or 1835, not at NLM, which is the only location given by ULS (no other locations in NNAM Cat., MBo Cat., Brit. Mus. Cat., Brit. Union Cat. Pdcls., or CRL Cat.) The case report being sought was cited in *Lancet* 1:437, 1834/35.

The same case is described by Carlizzi, Francesco Maria in *Rappiccatura, curazione e totale risaldamento di us naso mozzo co'denti: e breve sunto dell'arte rinoplastica*. Napoli, dai tipi dell'ateneo, 1833. 20 p. (NUC Pre-1956 Imprints, 95:495. NNC-M's copy is missing; pamphlet not held by NLM, NNAM, MBo, MdB, ICJ, or RCS(E).)

If you can give information, or a helpful clue, please write Mary Mueller, Bio-Medical Library, University of Minnesota, Minneapolis, Minn. 55455.
